## DETAILED OFFICE ACTION

### Election/Restrictions

Claims 1- 28 are pending in this application.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

**Group I. Claims 1-24 drawn to a semiconductor device, classified in class 257, subclass 782.**

**Group II. Claims 25-28, drawn to process of making a semiconductor device, classified in class 438, and subclass 118.**

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of following can be shown: (1) that the process as claimed can be used to make other and materially different product or by hand, or (2) that process as claimed can be made by another and materially different process. (MPEP § 806.05(f)). In the instant case unpatentabilities of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by the processes materially different from those of the group II invention, for example, in the claim 25 a method for making the device of claim 1, wherein the step of applying the adhesive on the second die can be performed first, the step of aligning and adhering the second die can be performed second which is a materially different method from claim 25 and the same structure of claim 1 will resulted.

3. in the case Applicant elect Group I, those invention are further required to be restricted under 35 U.S.C. 121 as the following:

Art Unit: 2818

The claims are directed to the following patently distinct species of the claimed invention:

**I/Species I. Claims 1-13** Illustrated in Figures 4A and as best as can be understood is described in claim 1 is directed to a apparatus with two dices **without the electrical connector**.

**II/ Species II. Claims 14-24** Illustrated in Figures 4B and as best as can be understood is described in claim 14 is directed to a apparatus with two dices **with the electrical connector**

4. For method and device claim these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of search are not co-extensive. Therefore, separate examination would be required and restriction for examination purposes as indicated is proper.

5. For Species election requirement, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 2818

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
